Paper Submission

1. The authors shall omit their names and affiliation from the submission.
2. In case the authors refer to their own prior work, please done either by referring to their prior work in the third person or referencing papers generically.
3. The authors shall exclude citations to their own works, which is not fundamental to understanding the paper, including prior versions (e.g., technical reports, unpublished internal documents) of the submitted paper. They should reference only necessary work using point (2). Hence, do not write: "In our previous work [3]" as it reveals that citation 3 is written by the current authors.
4. The authors shall remove mention of funding sources, personal acknowledgments, and other such auxiliary information that could be related to their identities. These can be reinstated in the camera-ready copy once the paper is accepted for publication.
